

- ✚ Free standing installation
- ✚ Design: black
- ✚ Cooling system: compressor
- ✚ Type of cold: air moving system
- ✚ Adjustable temperature range of use: 10 - 22°C
- ✚ Electronic regulation
- ✚ Thermometer with white digital display
- ✚ Humidity control: natural (hygrodynamy concept)
- ✚ Analog display hygrometer
- ✚ 1 glass door, anti-UV treated glass with lock

Eco-responsibility

Our products are manufactured in compliance with European environmental rules. Especially, refrigerant fluid (R600a) doesn't reject neither CFC nor HFC and respect environment.

Energy consumption is calculated based on the result obtained for 24h in standard test conditions. The actual energy consumption depends on the conditions of use and location of the device.

This equipment is designed to be used in an ambient temperature between 16 -38°C.

* depending on the size of cigars and if you store them in their original packaging

DESIGN AND PERFORMANCE

A real cellar, the cigar cellar allows the enthusiast to keep his most beautiful cigars in complete safety (lock). The glass door, treated against UV, sublimates your cigars and creates a real setting.

TO THE NEAREST DEGREE

In order to restore all its aromas, the cigar needs a hygrometry between 65 and 75%, and a temperature between 16 and 20°C. The cigar does not like variations in temperature or humidity, so care must be taken to keep them in a stable and regulated environment. For added security, the cellar control panel permanently displays the set humidity level.

OPTIMIZED STORAGE

Preserve and showcase between 200 and 250 cigars on its 2 tilting natural wooden shelves (tilting from 0 to 30°) and in its lower cellar drawer. These accessories are included with the cellar and optimize storage. The total capacity depends on the size of your cigars and if you store them in their original packaging.

> EQUIPMENTS INCLUDED

- 3 sliding wooden drawers (oak)

> TECHNICAL CHARACTERISTICS

- Energy class: E
- Annual electrical consumption: 76 kWh
- Climatic class: ST
- Noise level: 38 dB
- EEI: 100.0
- Voltage: 220-240 V
- Power input: 60 W
- Category: 2 - Wine cellar
- Type of gas: R600a

> COMPATIBLE ACCESSORIES

Only available in spare parts

Management of hygrometry and temperature :

To reveal all their aromas, cigars need a humidity between 65% and 75%, and a temperature between 16 and 20°C. The cigar does not like changes in temperature or humidity, so make sure to keep them in a stable and controlled environment.

Adjusting humidity and temperature :

Simply adjust the humidity according to your cigar storage preferences. The control board of the cellar display continuously the setting humidity. By default, your device is set to 70% humidity and 20°C.
